- A tutorial about ontology modeling best practices.
- Coming from the “Ontology Design Patterns” community.
- Recommended by us for all types of ontology modeling, including as graph schema for linked data and knowledge graphs.
- We are approaching a point where our experiences can consolidate into crisp recommendations, but we’re not quite there yet. I.e. there’s still work (and research) to be done.
- Join us if you’re interested:
 Google Group called “Ontology Design Patterns”

- **Insert class diagram using graphical UI**
- **System asks you whether to include corresponding axioms (taken from a pool of most common axioms for the diagram)**
- **You can of course also manually add further axioms.**
