

Managing Data for Integration and Reuse

Pascal Hitzler

Data Semantics Laboratory (DaSe Lab)
Kansas State University

<http://www.daselab.org>

- I'm new here (joined 2019 as senior hire)
- I brought most of my lab (7 PhD students)

Acquisition (GPS, UAVs, sensors) is fun and flashy as is Reuse (all these cool data analytics / machine learning results)

But a lot of time is sunk in the data management piece.

Managing data for

- **Sharing**
- **Discovery**
- **Integration**
- **Reuse**

Management is most expensive when

- **Integrating from independent sources**
- **Repurposing**

- **Driving question: How do you lower data management cost?**
 - How do you make it easier to share and discover data?
 - How do you make it easier to integrate data?
 - How do you make it easier to repurpose data?

- **Three key aspects to addressing these issues:**
 - Use of leading standards.
 - Self-explanatory data (which carries a *formal semantics*).
 - Data organization which resonates with human experts' conceptualizations.

Laura Kelly

Governor of Kansas

Laura Kelly is an American politician serving as the 48th governor of Kansas since 2019. A member of the Democratic Party, she represented the 18th district in the Kansas Senate from 2005 to 2019. Kelly ran for governor in the 2018 election and defeated the Republican nominee, Kansas Secretary of State Kris Kobach. [Wikipedia](#)

Born: January 24, 1950 (age 69 years), New York, NY

Spouse: Ted Daughety

Party: Democratic Party

Office: Governor of Kansas since 2019

Education: Indiana University, Bradley University, Indiana University Bloomington

Children: Kathleen Daughety, Molly Daughety

Michael McRobbie

President of Indiana University

Michael Alexander McRobbie AO is an Australian-American computer scientist, educator and academic administrator. He became the eighteenth president of Indiana University on July 1, 2007. [Wikipedia](#)

Born: October 11, 1950 (age 69 years), Melbourne, Australia

Spouse: Laurie Burns (m. 2005)

Education: The Australian National University, The University of Queensland

Books: Automated Theorem-proving in Non-classical Logics, Automated Deduction - Cade-13

News Release 19-016

NSF Convergence Accelerator awards bring together scientists, businesses, nonprofits to benefit workers

New projects address some of the most promising areas of research

Convergence Accelerator awards are focused on three areas:

- Open Knowledge Network - Knowledge networks pool together many types of information and ideas so that they can be accessed and leveraged to create new understanding. These networks have become important tools for many large organizations that are taking advantage of the current Big Data revolution. However, these vast information networks are often unavailable to many in government, academia, small businesses and nonprofits. The Convergence Accelerator's new awards will fund the creation of a nonproprietary infrastructure for building an Open Knowledge Network. Some of the teams supported by the new awards will build tools that will identify, harvest, and incorporate datasets for the network. Others will build elements of the open knowledge network that address specific challenges, such as manufacturing, urban infrastructure, geosciences, biomedicine and much more. Yet others will provide key aspects of the technical infrastructure needed to facilitate the creation and use of such networks.

Convergence Accelerator Phase I (RAISE): Spatially-Explicit Models, Methods, and Services for Open Knowledge Networks

NSF Org:	OIA Office of Integrative Activities
Initial Amendment Date:	September 10, 2019
Latest Amendment Date:	September 10, 2019
Award Number:	1936677
Award Instrument:	Standard Grant
Program Manager:	Lara Campbell OIA Office of Integrative Activities O/D Office Of The Director
Start Date:	September 1, 2019
End Date:	May 31, 2020 (Estimated)
Awarded Amount to Date:	\$999,547.00
Investigator(s):	Krzysztof Janowicz jano@geog.ucsb.edu (Principal Investigator) Mark Schildhauer (Co-Principal Investigator) Dean Rehberger (Co-Principal Investigator) Pascal Hitzler (Co-Principal Investigator) Wenwen Li (Co-Principal Investigator)

RDF 1.1 Concepts and Abstract Syntax

A historical illustration in a muted blue-grey tone showing a group of people, including men, women, and children, in a setting that appears to be a slave market or a plantation. One man in the center is wearing a wide-brimmed hat and a long coat, looking towards the right. A woman to his left is holding a child. In the foreground, a woman is seated on a wooden stool, looking up at another woman standing before her. The background shows simple buildings and a fence.

Enslaved

 Peoples of the
Historic Slave Trade

Building a Linked Open Data Platform for the study and exploration of the historical slave trade.

- **National Institute of Standards and Technology (NIST)**
- **Data Integration for Food Supply Chains**
- **Focus on grains**

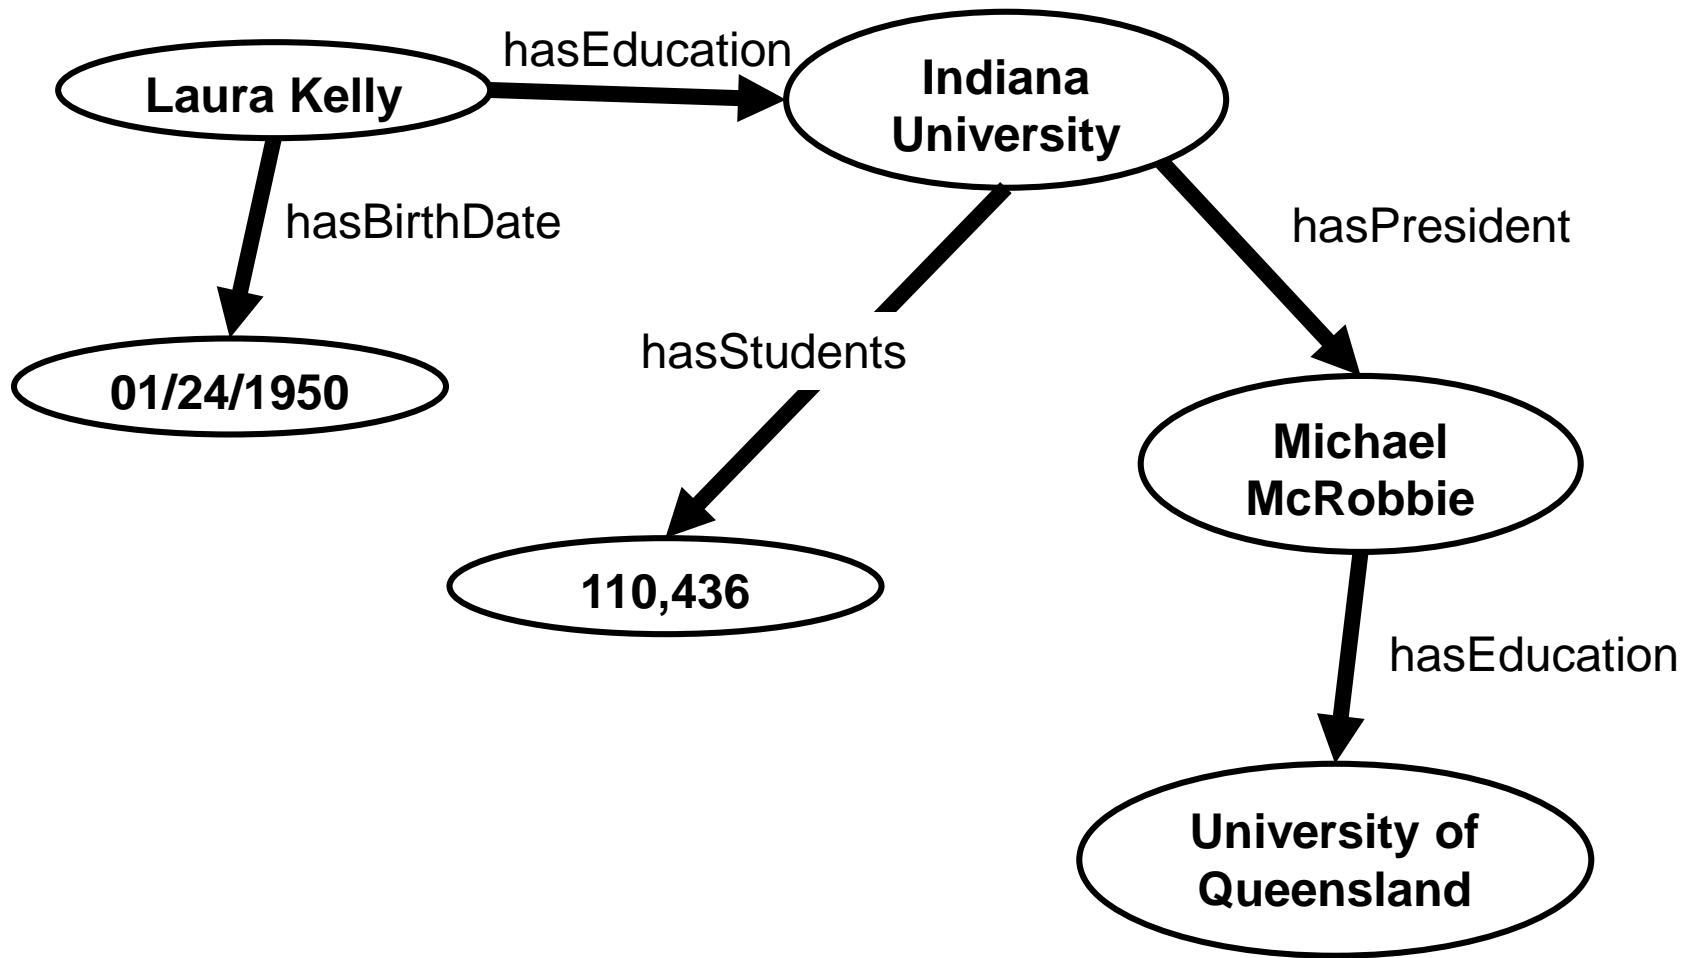

- **Development of a data model (schema/ontology) and software tool support for integrating data relevant to the traceability of food supply chains.**
- **Working in close collaboration with NIST.**

- Grain Traceability
- Data model is central for lowering cost in all parts of the pipeline.
- Tracing along splits and merge.
- Elevators as black boxes.
- Containers may carry contaminants
- ...

Figure acknowledgement: NIST / Evan Wallace

This is not a good Knowledge Graph!

- **Structure resonates with both**
 - human expert conceptualizations
 - data and use case requirements
- **Generally low maintenance cost**
 - **Sustainable: robust for future use and re-use**
 - **Extendable without high management costs**
- **Ease of use with software and tools**
- **Machine processable (standards)**
- **Meets technical, legal, societal requirements**
- **Stakeholder buy-in**

Lead Question:

How to lower knowledge graph management cost while meeting requirements.

Principles:

Our design and development process

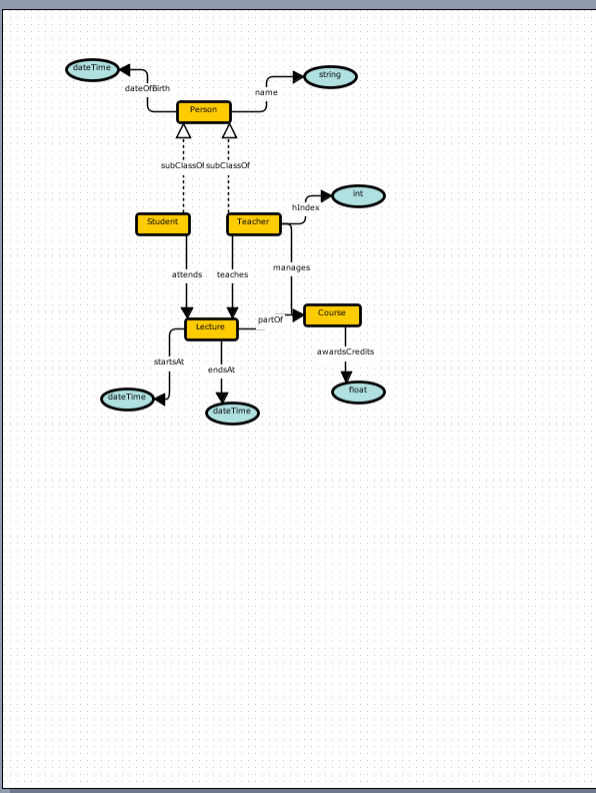

- **bridges interdisciplinary barriers,**
- **produces artefacts which resonate with human expert understanding,**
- **is fully compatible with leading standards,**
- **is made to save on development and management costs.**

CoMODIDE modeling interface

Active ontology x Entities x Individuals by class x DL Query x CoModIDE x

CoModIDE Schema Editor: Core constructs XSD datatypes

string int float
boolean dateTime

CoModIDE Pattern Library: Pattern category selector: Any

Patterns:

Name	
Agent Role	Documentation
Aggregation, Bag, Collection	Documentation
Event	Documentation
Explicit Typing	Documentation
Identifier	Documentation
Name Stub	Documentation
Participant Role	Documentation
Property Reification	Documentation
Provenance	Documentation
Quantiles and Units	Documentation
